PHP - HOE 4

Due Tuesday by 11:59pm   **Points** 5   **Submitting** a website url   **Available** until Mar 5 at 11:59pm

Develop PHP pages/functions to enable a user to search for actors by last name (the user could enter a full or partial last name), maximum age (use the Age column for the search; not AgeReal) and gender (use radio buttons for gender). The user can choose to provide or not provide values for each search criterion. Retrieve and display all the actors (NameFirst, NameLast, Age and Gender) that match the specified criteria.

Note: Gender is stored as "M" or "F" in the database.

Submit just the URL of your PHP search page.
