CIS 665 – Spring 2019
HTML and CSS Assignment
Due Date: Tuesday, February 19 @ 11:59 PM

Design and build a 3 page web site on any one theme (e.g., travel, business, hobby, sport, entertainment, family).

The web site should include
- consistent header and footer for the three pages
- at least one photo or graphic
- at least one table
- at least one list (ordered, unordered or definition)
- links to other external web pages that you did not develop
- links to the other pages you developed for this site
- significant content (a few paragraphs of text to demonstrate your knowledge of formatting and layout styles)
- professional layout
- A "developed by" line in the footer with your name.
- one or more external style sheets to style and fashion the layout of your html pages **(Note: this requirement will account for 50% of the points for this assignment)**

Save your files on your "W drive". You must save it within the public_html folder. You can create other folders within public_html to organize your files. A file saved within the public_html folder on your "W drive" has the following URL address:

https://cisweb.biz.colostate.edu/cis665/SP19LastName.eName/mypage.html.

Example: If Pat Anon (eName: anonp) had a page, **welcome.html**, in a subfolder called **Html5** within **public_html** folder, the URL for **welcome.html** would be:

https://cisweb.biz.colostate.edu/cis665/SP19Anon.anonp/html5/welcome.html

Submit the following on Canvas:

- The URL of your starting web page (home page)
- A zipped file containing all the html and css files that you developed for this assignment (it is not necessary to submit image or audio/video files).
